DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 11-17, drawn to an apparatus for aerating soil, classified in class 172, subclass 21.
- II. Claims 8-10, 18-21, drawn to a soil aerator system adapted to be coupled to a vehicle, classified in class 172, subclass 246.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the apparatus for aerating soil (independent claims 1 & 11) as claimed does not require that none of the second set of rotating planes overlap any of the first set of rotating planes (claim 1). Similarly, the combination as claimed does not require the particulars of the subcombination as claimed because the apparatus for aerating soil does not require a first soil fracturing means being staggered relative to a second soil fracturing means such that the first soil fracturing means is operable to revolve about the first holding means without

interference from the second soil fracturing means (claim 11). The subcombination has separate utility such as with a hand-held aerating or tillage device.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
